Spring '62

Wholesale Trade List

SPRING 1962

★ OUR GUARANTEE

All items are guaranteed to be true to name and of the size and age indicated. We have been growers of lining out stock for 95 years and consider our host of old and new customers our greatest asset. We always strive to please and do not consider any deal complete until our customer is satisfied in every respect.

★ TERMS

Cash in full with order earns 3% discount. Boxing and baling will be charged at actual cost only. Cash customers will be billed for boxing after shipment.

★ TO ESTABLISHED CREDIT

1%—10 days from date of invoice. All accounts due 30 days from date of invoice.

★ RATES

25 of same size and variety earns 100 rates, 250 of same size and variety earns 1000 rates. If less than 25 trees of same size and variety are ordered, add 20% to 100 rate.

★ CASH DISCOUNTS

When cash in full accompanies the order and order is received previous to April 1 for spring shipping season or previous to September 1 for fall shipping season, then we will allow 3% cash discount. If the trees are picked up here at the nursery during the shipping season and paid for in full at time of pick up, then we will allow 2% cash discount. If the invoice is paid within ten days from date of invoice our new policy will be to allow 1% discount. Net 30 days.

LONG DISTANCE PHONES—

Pioneer 3-4920
3-5320

**WISCONSIN'S LARGEST
WHOLESALE NURSERY**

LINING OUT STOCK

ONE OR A MILLION!!

EXPLANATION — PLEASE NOTE!

After each item 2 or 3 yr. sdlgs. indicates the age of the tree and 'sdlg' indicates seedlings, such as 1 yr. sdlgs. means one year seedlings, 2 yr. sdlgs. indicates 2 year seedlings. Each 'X' after an item in transplanted, XX is twice transplanted.

ARBOR VITAE

TECHNY DARK GREEN ARBOR VITAE

TECHNY DARK GREEN ARBOR VITAE— (Thuya occ. var. Techny)

This variety was selected by Mission Gardens of Techny, Illinois. We have never seen a better dark green. We now have it in the hands of hundreds of our customers all over the Middle West and in many eastern, western and some southern states, and have never had a report of it winter-burning or changing color. Really stays dark green all winter. Our stock is genuine and from the original plants, and this is the first year we have not had to limit our customers to 100 plants or less. Try it, you will really like them.

12-18 in. XX S&H	75.00	

AMERICAN ARBOR VITAE—

(*Thuja occidentalis*)

Our strain is grown from seed collected from upland specimen trees selected by ourselves for their graceful beauty, color and stature. Unsurpassed for windbreaks, group plantings, reforestation and no better or more economical hedge evergreen has ever been found.

	100	1000

Larger sizes available for screen work.

250 trees of same size and variety
at 1000 rates.

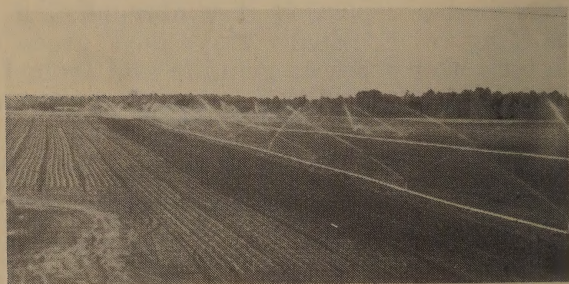

PYRAMIDAL ARBOR VITAE—

(*Thuja occ. pyramidalis*)

There seems to be many strains of pyramidal arbor vitae. After many years of selection we now have a strain identified by a softer more dense foliage, and a uniform pyramidal habit of growth. You will like them.

6-9 in. X	35.00	300.00

PROPER WATERING, FERTILIZING, AND GOOD
CARE MEANS QUALITY PLANTING STOCK.

SIBERIAN ARBOR VITAE—

(*Thuya occ. wareana*)

As the name implies, it is one of the most robust of this family with a rugged constitution—thriving where others may fail. The foliage is dark green and the tree conical in type. The branches are short and stiff, and is a rather slow-grower.

	100	1000
6-9 in. X	45.00	350.00
6-9 in. XX S&H	60.00	
9-12 in. XX S&H	75.00	

Woodwards Globe Arbor Vitae—

(*Thuya occ. woodwardi*)

The true woodwards strain of globe arbor vitae maintains its dense globe shape with little or no shearing. Foliage is a pleasing sea-green color.

6-9 in. X	40.00	350.00
6-9 in. XX S&H	55.00	
8-10 in. XX S&H	65.00	

(S&H means sheared and heavy)

FIR

BALSAM FIR—

(*Abies balsamea*)

An old timer, but has come into great demand in recent years for Christmas trees.

It's delightful aromatic fragrance coupled with its needle retaining quality, characteristic of all firs, has always marked the Balsam as the traditional Christmas tree. Nothing wrong with it as a landscape ornamental either.

3-6 in. 3 yr. sdlg.	8.00	40.00
4-6 in. X	16.00	80.00
6-9 in. X	22.00	110.00

CONCOLOR FIR—

(*Abies concolor*)

This is the aristocrat of all Christmas trees. It's typical fir odor is the strongest and most aromatic of any fir. Also very desirable as an ornamental, equal in demand to Colorado Blue Spruce. Needles are charmingly long and many have the bluish cast found on Colorado Blue Spruce. Grows slower than most fir, but a very desirable tree.

3-5 in. 2 yr. sdlg.	8.00	40.00
5-8 in. 3 yr. sdlg.	12.00	60.00
2-4 in. X	14.00	70.00
4-6 in. X	16.00	80.00

DOUGLAS FIR—

(*Pseudotsuga taxifolia*)

A widely grown fir, valuable as an ornamental, for reforestation plantings or Christmas trees. An excellent grower, shears well and has all the prime qualities of the fir family.

	<u>100</u>	<u>1000</u>
3-6 in. 2 yr. sdlgs.	6.00	30.00
4-6 in. X	12.00	65.00
6-9 in. X	16.00	80.00
9-12 in. X	20.00	95.00

JUNIPER

ANDORRA JUNIPER—

(*Juniperus c. dep. plumosa*)

One of the finest of the low growing evergreens. Seldom grows more than 15-18 inches high. Fall color reddish bronze. Ideal for ground cover under low windows and also as a container plant.

4-6 in. X	30.00	250.00
6-9 in. X	40.00	350.00
6-9 in. XX S&H	65.00	550.00
9-12 in. X	45.00	400.00

We Dig Trees in Mid Winter if Necessary

Cash with order earns 3% discount

HETZI JUNIPER—

(*Juniperus chinensis hetzi*)

Sometimes erroneously called blue pfitzer. Grows and looks like a Pfitzer Juniper except the foliage is more bluish and lighter colored. Also a faster and more upright grower than Pfitzers Juniper.

	<u>100</u>	<u>1000</u>
6-9 in. X	35.00	300.00
9-12 in. X	40.00	350.00
12-15 in. X	50.00	
12-15 in. XX S&H	65.00	

PFITZERS JUNIPER—

(*Juniperus chin. pfitz.*)

This evergreen needs no introduction as it is probably one of the most popular of all evergreen ornamentals, and certainly the most used spreading type. Will grow well almost everywhere.

We are proud of our Pfitzers Juniper. Our method of rooting produces a mass of roots up the entire stem, not just at the base. This characteristic continues into the transplant. Note our pictures of both rooted cuttings and transplants.

6-9 in. X	35.00	300.00
9-12 in. X	40.00	350.00
12-18 in. X	50.00	450.00
6-10 in. XX S&H	50.00	450.00
10-12 in. XX S&H	60.00	550.00

(S&H means sheared and heavy)

SAVIN VON EHROH—

(*Juniperus sabina* "Von Ehron")

Darker green than Savin and grows faster. An excellent spreader. Shears readily into an attractive ball and is more resistant to blight than regular Savin Juniper.

8-10 in. XX	50.00
10-12 in. XX S&H	65.00

RED CEDAR—

(*Juniperus virginiana*)

This is the basic upright juniper from which many selections have been made over the years. Also used extensively as an understock for grafting junipers. Upright and conical in growth developing rather rapidly.

2-4 in. 1 yr. sdls.	4.00	20.00

Evergreen Nursery Co.

Sturgeon Bay, Wisconsin

— Est. 1864 —

LARCH

EUROPEAN LARCH—

(*Larix decidua*)

An almost forgotten evergreen and whose merits are sadly neglected. One of the most graceful and attractive of all conifers, as well as one of the fastest growing. Four to five feet per year is not uncommon. Transplants well, but is imperative it be done before growth starts which is early. A tree that will kindle a lot of favorable comments from your customers.

6-12 in. 2 yr. sdlg.	10.00	50.00
9-12 in. X	19.00	85.00
12-18 in. X	35.00	200.00
18-24 in. X	45.00	300.00
2-3 ft. X	55.00	
2-3 ft. XX	65.00	
3-4 ft. XX	75.00	

JAPANESE LARCH—

(*Larix leptolepis*)

Has all the pleasing characteristics of the European Larch plus more. The bark is an attractive warm brown, showing an interesting pattern as it scales off in narrow strips. The most handsome of all larches, and a more rapid grower than even the european.

	100	1000
4-10 in. 2 yr. sdlg.	15.00	75.00
18-24 in. X	55.00	400.00
2-3 ft. X	65.00	
3-4 ft. X	75.00	

PINE

Note: The European Shoot Moth which attacks all pine is distressing some areas. It is now widespread throughout most of the country. However, we have for several years carried on a comprehensive preventative spray program on all the pine we grow. The Wisconsin State Inspection officials have never found shoot moth on any of our lining out pines, and we propose to keep it that way.

AUSTRIAN PINE—

(*Pinus nigra*)

A hardy European variety that is widely planted in this country. Long grayish-green needles and dark gray bark—very attractive. An excellent ornamental. One of the few evergreens that will thrive under smoky metropolitan conditions.

	<u>100</u>	<u>1000</u>
3-6 in. 2 yr. sdlg.	5.00	25.00
3-5 in. X	9.00	45.00

Sturgeon Bay, Wisconsin

— Est. 1864 —

BULL OR WESTERN PINE—

(*Pinus ponderosa*)

One of the most important pines in the Western states. A good timber tree and an excellent ornamental. Needles dark green, 5-10 inches long. Grows to 150 feet and over. Also ideal as a long-needed Christmas tree. Makes excellent table top Christmas trees.

	100	1000
3-5 in. 2 yr. sdls.	6.00	30.00

18-24 in., 1 yr., 3 stem birch clumps offered
on next page

BIRCH, WHITE—

Betula papyrifera

Most birch on the market today are collected. Ours are Nursery Grown Transplants. We collect our own seed from select specimens, and germinate the seed under controlled conditions. The little seedlings are transplanted to small peat pots and later put in the field. Here under an intensive watering and feeding program, we have produced trees several feet in one year. They are superb plants.

BUT!

In spite of a greatly increased production schedule for this year, we are now sold out on all clumps for this spring. Many of our customers who were unable to get our clumps last spring, placed their order then for this year. We still have a few thousand 2-3 and 3-4 ft. single stem left, offered below. If you want some clumps for this fall 1962 or next spring (1963), better order now. We are booking at these prices.

3 stem clumps	<u>10</u>	<u>100</u>

EVERGREENS TO POT FOR IMMEDIATE RESALE

If you are in need of evergreens of good quality, heavy, and suitable for potting for immediate resale, we can select a special grade for this purpose from any items marked S&H. Write us.

Note: When any item is followed by S&H, it means that grade has been sheared and is heavy. If you wish a further selection from this grade of plants suitable for potting and immediate retail sales write for quotation.

BITTERSWEET—

(<i>Celastrus scandens</i>)	100	1000
3-6 in. 1 yr. sdlg.	10.00	75.00

CORNUS RACEMOSA PANICULATA—

(Gray dogwood)

One of our better native dogwoods. White berries borne on red fruit stalks giving a reddish winter cast. Stands heavy pruning and makes good mass border plantings.

9-12 in. 2 yr. sdlg.	13.00	90.00

CONTAINER STOCK

We are growing a complete list of container stock in evergreens, roses, shade trees, and shrubs. Write for complete list.

2 Year Seed Beds

TILIA CORDATA—

(European Small Leaf Linden)

One of the best small shade trees. Rapidly becoming more popular.

4-6 in. 1 yr. sdlg.	9.00	45.00
6-12 in. 1 yr. sdlg.	13.00	70.00
9-12 in. X	16.00	
12-18 in. X	22.00	

VIBURNUM CASSINOIDES—

(Withrod Viburnum)

Very hardy and does well in shade. Grows 6-8 ft. White flowers in May-June followed by colorful elongated clusters of berries first yellow and then turning pink and finally a deep blue. All three colors may be observed on the plant at the same time.

12-18 in. X	20.00	
18-24 in. X	30.00	150.00

VIBURNUM LANTANA—

(Wayfaring Tree)

Large deep green leaves. Dense grower, making an excellent screen plant. Berries red, later turning a jet black.

3-6 in. 1 yr. sdlg.	10.00	50.00
12-18 in. 2 yr. sdlg.	16.00	
18-24 in. 3 yr. sdlg.	19.00	
2-3 ft. X (heavy field grown)	40.00	

VIBURNUM LENTAGO—

(Nannyberry)

Grows to 25-30 feet. White flowers, black berries, and good reddish fall color. Excellent for specimens and borders. 100 1000

6-9 in. 2 yr. sdls.	11.00	60.00
9-12 in. X	22.00	
12-18 in. X	29.00	

VIBURNUM TRILOBA—

(Am. Highbush Cranberry)

Grows to 12 feet. Clusters of bright red berries in fall. Foliage colorful in fall. Good grower and disease free.

4-8 in. 2 yr. sdls.	10.00
5-10 in. XX	25.00

ZELKOVA SERRATA—

Leaves have same appearance as Elm, but this Asiatic tree is free of serious insects and diseases. Grows rapidly and may be grown as either a single or multiple trunk. Makes an excellent lawn or street tree. Rapidly becoming more popular.

6-12 in. 1 yr. sdls.	16.00	80.00
12-18 in. 1 yr. sdls.	20.00	120.00

CHRISTMAS TREE
PLANTING STOCK

CHRISTMAS TREES

Approximately 50 to 60 million Christmas trees are used in this country annually, and the growing of them in commercial plantations is getting to be a very lucrative business. Good planting stock is imperative for success. We grow large quantities for this very purpose and can supply quality trees at reasonable prices. Plant a few acres every year and you will soon have a nice annual income. We would be happy to advise you on soil, cultural practices, etc.

Seedlings are often planted for Christmas trees in an attempt to save money. It is false economy. True, seedlings cost less, but as good survival can never be expected from seedlings as from transplanted stock. The few extra cents a good transplant costs brings tremendous dividends in excellent survival. The need for replanting is eliminated, and saleable trees can be grown two to three years sooner than if seedlings were used. The varieties listed next page are the most used for Christmas tree planting, although Douglas Fir, Concolor Fir, and Ponderosa Pine are also frequently used. Write for special quotations.

The sizes on next page have wider variance than the same variety offered elsewhere in this list. By saving cost of grading we can offer them cheaper, and for Christmas tree planting they are equally as good.

Techny **DARK GREEN ARBOR VITAE**

an Exciting New DARK GREEN Arbor Vitae!

**Where It Came From,
- What It Looks Like**

This Arbor Vitae was first discovered in a block of American Arbor Vitae in the nursery of the Mission Gardens of Techny, Illinois. It was outstanding because of its intense dark green color regardless of winter weather conditions.

We planted a number of them in our stock block about 10 years ago and after several years of observation, were convinced it was an unusual new dark green Arbor Vitae. It proved to be a good grower, and shears well as you will see by the photo on the left which was taken on our own grounds in mid-winter.

Its natural habit of growth is somewhat more narrow than the American Arbor Vitae, but wider than the Pyramidal Arbor Vitae hence making an excellent intermediate type.

Where It Will Go

We have distributed this new dark green Arbor Vitae to our customers throughout the middle west, most eastern states, and to some farther south than we had ever dared hope it would do well.

As of *this date* we have never had one report of it having shown any winter discoloration or injury, regardless of the severity of the winter. It has consistently held its dark green color around the calendar.

We predict it is destined to become the most desired upright Arbor Vitae. Get yours now and **PROFIT** by this exciting new dark green Arbor Vitae.
